Destiny Times Three

Fritz Leiber (1910 - 1992)

Thorn and Clawly seek to present to the World Executive Committee some most disturbing findings, findings that indicate that we may not be alone within the nexus of realities, that there could be other worlds existing parallel to our own, springing forth from a specific point in time. That in and of itself may not constitute a significant problem, but what if one of these worlds was not content with their lot in life and were organizing a secret invasion into our utopian reality?
